Last Update 13 March 2025

Call Transfer – Allows incoming calls to be transferred to another number.

Conference – This feature will allow you to initiate a conference call for up to 6 parties.

Call Forward – Call Forward allows incoming calls to your telephone number to be automatically forwarded to another telephone number of your choice. This feature can be applied to all calls or selectively applied to “Don't Answer” or “Busy” call situations.

Call Forward Don't Answer Programming – This feature will forward all calls which remain unanswered after a predetermined period of time.

Call Forward Remote Activation – This feature permits the Call Forwarding Universal subscribers who are traveling to activate, change, or deactivate their call forwarding service from a remote location.

Last Number Re-dial – The Last Number Redial feature allows you to automatically re-dial your last called number.

Call Pick-Up – Allows you to answer calls incoming to another telephone in your office. The ringing phone must be a member of your call pick-up group in order for you to answer the incoming call with this feature.

Directed Call Pick-Up – Allows you to answer a call that is ringing on any line.

Ring Again – When you are making a call and encounter a busy signal, this feature will cause the switch to notify you when the number is free by sending a distinctive ring to your phone. When you pick up your phone the switch will re-dial the number called.

Speed Call – Allows you to place calls by dialing a one digit code (for the Short List), or two digit code (for the Long List), that you've programmed.

Call Hold – This feature allows the user to hold one call until either party hangs-up. With one call on hold the user can still place another call.

Customer Oriented Trace – Allows the end users who has been receiving harassing calls to activate and immediate trace of the last incoming call. A subscriber who wishes to trace the call goes off hook, receives dial tone, and then dials the COT activation code.

Call Park – This feature allows an IBN station with the PRK option to park a call against the directory number.

Cancel Call Waiting This feature prevents, on a per-call basis, any incoming calls from Call Waiting on the line.

NOTE:

Feature availability and access is dependent upon the Class Of Service assigned to each phone. The telephone Control Officers may request that additional features be assigned to a particular phone.
