Subj: U.S. NAVAL SUPPORT ACTIVITY, NAPLES, ITALY CARNEY PARK RECREATIONAL AND TEEN CENTERS' DRINKING WATER

Encl: (1) Carney Park Rec-Teen Centers Complete Test Results

1. The Navy is committed to maintaining safe drinking water on its installations. Our drinking water distribution system is regularly tested for lead and is in compliance with the Environmental Protection Agency's (EPA) Lead and Copper Rule and the Safe Drinking Water Act.

2. Lead exposure is a particular concern for children. Lead in drinking water typically comes from the plumbing inside buildings including lead service lines, fittings, solder, water fountains/coolers, or water faucets. The Navy policy requires we test the lead content of drinking water in priority areas such as Youth-Teen Centers (YTCs), schools, and Child Development Centers (CDCs) every five years. Testing at both the Carney Park Recreational Center and at the Teen Center was conducted on 27 March 2021.

3. I am pleased to report that all drinking water intended for consumption, to include drinking water and water intended for cooking or washing, is at or below the Navy lead screening level of 15 parts per billion (PPB).

4. Navy environmental personnel conducted this testing at the Carney Park Recreational Center and at the Teen Center following Navy policy. In all, two samples were taken and sent to the U.S. Army Public Health Center certified laboratory for analysis.

5. A copy of all test results is enclosed for your information.

a. To learn more about lead in drinking water in schools and day care centers visit the following EPA website: https://www.epa.gov/dwreginfo/lead-drinking-water-schools-and-child-care-facilities.

b. To learn more about the installation water quality, see the annual water quality report: https://www.cnic.navy.mil/regions/cnreurafcent/installations/nsa_naples/om/environmental_support/drinking_water_consumer_confidence_report.html

6. While lead in the drinking water at these facilities is below the Navy screening levels for schools and daycare centers, if you have any health questions or concerns, I encourage you to set up a virtual visit with your health care provider through TRICARE Online or call the U.S Naval

Hospital, Naples, Italy main appointment line (629-6000, or 081-11-6000). Virtual Visits afford the time required for you to address particular concerns with your primary care provider.

7. For further information, please contact LT Jamie E. Moroney, Public Affairs Officer, at DSN: 314-626-5912, COMM: +39-081-568-5912, or e-mail: jamie.moroney@eu.navy.mil.

Notes:

[1] Affected outlets were immediately secured after receiving verbal communication from the lab on results exceeding the recommended level of 15 ppb.

[2] Post-remediation sampling was initially conducted on[ENTER DATE]. Additional [CORRECTIVE ACTIONS DESCRIPTION] were implemented and final results below recommended level of 15ppb for sample collected on[ENTER DATE] are shown on the table.
